Complimenting the nursing and office staffs of Torrance Memorial Hospital, Mrs. Minnie S. Brooks, office manager at the hospital, entertained Monday and Tuesday afternoons at a garden tea in her attractive Portola avenue home. Her guests on Wednesday afternoon were other employees of the hospital.

Incentive for the enjoyable affair was the picturesque setting—lavender, blue and white wisteria blossoms overhanging the garden and flowering peach trees and camellias as its border.

The guests also were delighted with an informal discussion of Mrs. Brooks' noted collections of hundreds of teapots, many of which have been added during the past year.

Miss Elsa Hammerstrom, hospital superintendent; Miss Jean Kresse, and Miss Sara Hague, office staff members, presided at the beautifully appointed tea table on the respective days.

**WHY DOES IT HURT?**

An abnormal spine may be wasting your energy and creating pain. Many people fail to consider the spine as a basic source of bodily ills. There are more spinal distortions than people realize. The cause of abnormal spinal positioning are many. In fact, we might say without fear of contradiction that there is no spine without some degree of abnormality.

One of the most common questions that a doctor is asked is, "Why does it hurt, and when will it quit hurting?" This question is so involved and there are so many possible reasons for pain that it is often impossible to fairly answer the question.

We do know that without proper circulation of the blood there is pain. Tie a string tightly around a finger for a few minutes and see what happens. The same thing happens if the circulation to the heart muscle is cut off even temporarily. This is usually caused by a thrombus, which causes a coronary thrombosis or myocardial infarction. The same situation can be applied to the liver, kidneys, or any other organ of the body.

So let's try and keep our bodies in repair before damage actually sets in. Thomas Edison, the great American inventor, once said, "The doctor of the future will give no medicine but will interest his patients in the care of the human frame... and in the cause and prevention of disease."
